

California Winegrape Inspection Advisory Board

Date: August 4, 2009

To: Winegrape Research Committee

From: Jerry Munson, Manager

Re: Committee Meeting of Friday, August 21 @ 10:00 a.m.
Dr. Roy Thornton's Lab – Fresno State
2360 East Barstow Avenue, Fresno

A meeting of the Winegrape Inspection Board's Research Committee has been called for the above time and place by Committee Chairman Greg Coleman.

The purpose of the meeting is to receive an update from Dr. Roy Thornton on his project entitled, "Quantification of Microbial Rot in Wine Grapes." Following Dr. Thornton's review of his project to date, the Committee will meet to decide whether or not to fund the second half of Thornton's 2009-10 proposal. We expect Nick Dokoozlian to be present to give the Committee some insights regarding his view of Thornton's progress on the project, and perhaps allow for a layman's explanation of Thornton's work.

While this is officially a Research Committee meeting, we know the members' interest in this project and that, along with the rather large investment the industry has made in this endeavor over the years, **we are inviting the entire Board** and hope to see as many of you as possible in attendance.

Quoting from Dr. Thornton's note when he sent me to enclosed map:

"Driving East along Barstow from Cedar there are some vineyards, then a large carpark on the left (north side) of the road. The first building after the carpark is the VERC building. I would suggest that you members enter the carpark and park close to our building - I think there is a charge of \$3. Also, there are two stop signs and a 25 mph speed limit between Cedar and our building (occasionally enforced)."

We look forward to seeing you again on the 21st.

Committee Members:	Greg Coleman	Pete Camarda	Stanton Lange
	Emilio Miranda	Pete Opatz, Jr.	Eric Shannon
	Kirk Brown, ex officio
